YES ON W
WATER FOR BELL GARDENS

RELIABLE & AFFORDABLE WATER FOR BELL GARDENS.

$41 MILLION* FOR THE CITY OF BELL GARDENS

That money could help fund community needs, like after-school and youth programs, safer parks, public safety and other important city services. This would not be a new tax.

AFFORDABLE WATER BILLS

Golden State Water offers discounts for eligible low-income customers to help make water bills more affordable. If Golden State Water serves the entire city, those programs would continue to be available for customers who need extra support.

SAFE WATER FOR FAMILIES

Clean water is important for everyday life for families, businesses, and the community. Golden State Water would bring more backup water supplies and treatment equipment to the city.

MORE SUPPORT FOR KIDS AND TEENS

Measure W could help fund after-school programs at city parks and recreation centers. These programs give kids and teens a safe place to go after school, with activities, supervision and support.

HOW IT WILL BE DONE

More than 60% of Bell Gardens already receives water service from Golden State Water. For the rest of the city, Bell Gardens owns the water system and hires an outside company to operate it. Measure W would transfer ownership of that city-owned water system to Golden State Water. The City would receive $41 million*.

THE CITY OF BELL GARDENS SAYS...

Measure W will "relieve the City and its taxpayers of substantial financial obligations associated with the ownership, operation and maintenance of the Water System, including capital improvement necessary to address aging infrastructure and emerging water quality requirements."

- BELL GARDENS CITY COUNCIL, RESOLUTION NO. 2026-53

*Golden State Water has agreed to pay the City $41,000,000 upon completion of the sale. Following a local vote, completion of the sale requires approval by the California Public Utilities Commission
